

Residential customers may be eligible for a sewer credit for watering sod, if the watering is done in the first season of growing after construction and the request for a credit adjustment is submitted before the bill's due date. Credit adjustments for sod watering will only be available for adjustments to sewer charges and will not be available for water charges. A sod watering credit may be issued for up to three (3) consecutive reading periods. A credit adjustment request form must be submitted for each of the consecutive reading periods in which they are seeking a credit adjustment. Failure to submit such request by the due date render the sewer charges ineligible for a credit adjustment. Customers requesting water and sewer credits for any amount, will be required to sign before a notary, an affidavit specific to the circumstances of events surrounding the customer's request.

Sod/Seed Watering Adjustment Request
